Computerized Flat Knitting Machine with WIDEGAUGE[®] Capability

FLEXIBLE SOLUTIONS WITH WIDEGAUGE® AND WideTandem®.

The new SSG[®]234SV and SSG[®]234SC are part of a new generation of computerized knitting machines by Shima Seiki, whose evolutionary progress has resulted in a fine balance of quality, productivity, user-friendliness and economy. In addition to such benchmark technology as the Spring-Type Full Sinker System and DSCS[®] Digital Stitch Control System, SSG[®]234SV and SC feature enhanced mechatronics for higher productivity, a built-in controller for spaceefficiency, a lower height for ease of use, as well as improved costperformance and easier maintenance. Such new technology as WideGauge[®] knitting, the R2Carriage[®] and WideTandem[®] capability further add to the SSG[®]234's appeal.

WIDEGAUGE[®] Knitting

Special knitting needles on SSG[®]234SV offer WideGauge[®] capability whereby a variety of gauges—from finer-gauges using all-needle knitting, to lower-gauges using half-gauge knitting—can be knit on a single machine. This allows the freedom to handle changing seasons and shifting trends without investing in a machine for every gauge or resorting to the complex, time-consuming task of gauge conversion.

R2CARRIAGE[®]

The new R2 (Rapid Response) Carriage[®] System increases maximum knitting speed over previous SES[®] models. More importantly, the

R2Carriage[®] achieves quicker carriage returns after each course. Combined, these improvements result in significant increases in productivity depending on the gauge and type of fabric.

WideTandem[®] Capability for Flexible Operation

SSG[®]234's twin carriages maximize the 90-inch knitting width through WideTandem[®] capability. Like the SES[®]234-S before, SSG[®] 234SV and 234SC can knit panels along the entire width of the needle bed in four-system mode, or two identical pieces in tandem mode. Furthermore with WideTandem[®], knitting width in tandem mode stretches from 37 to 42 inches, a significant increase in versatility that matches the capability of the larger SES[®]254-S.

DIMENSIONS

Average Weight

SSG234 1,375kg (3,025 lbs) Actual weight is dependent upon gauge and optional equipment.

All dimensions are in millimeters.

SPECIFICATIONS

SPECIFICATION		
Туре	SSG [®] 234SV	SSG [®] 234SC
Gauge	7, 12, 14	7, 8, 10, 12, 14, 16
Knitting width	Variable stroke. Max 90" (229cm)	
Tandem width	Max 42" (107cm) \times 2, WideTandem [®] (same knitting width as SES [®] 254).	
WideGauge®	Wide range of gauge knit on a single machine.	—
Knitting speed	Max 1.3m / sec. Knitting speed varies according to gauge and knitting condition. Variably adjustable speed levels. 10 additional programmable speeds.	
Stitch density	70 levels, electronically controlled.	
Racking	Motor-driven racking mechanism. Max 2-inch racking. 1/2 and 1/4 pitch also available from any position.	
Knitting system	Double KNITRAN® system. Twin R2Carriage® system.	
Transfer	Simultaneous transfer, front or back, independent of carriage direction. Split stitch possible without exchanging yarn carriers.	
Sinker system	Spring-type moveable full-sinker system.	
Stitch presser	Special motor-driven system allows individual adjustment for on / off in knit and transfer.	
Needle hook conversion	Conversion between LL-size and MM-size possible without exchanging cams.	—
Needle selection	Full jacquard selection via special solenoid actuators.	
Takedown device	Main rollers: Changeable 99 levels, automatically adjustable on each level. Sub rollers : Changeable 99 levels, automatically adjustable on each level. Automatic opening and closing.	
DSCS®	Consistent loop length by digital control method. 4 encoders and yarn feed roller with 10 positions on both sides as basic configuration to allow yarn supply from both sides during tandem operation. Optional.	
Yarn feed rollers ^{2,3}	10 positions on both sides (SV7G only) ³ .	—
Side tensions	16 on each side	
Yarn carriers	16 normal carriers	
Top tensions	32 tension devices. One-touch easy threading, Lowered 100mm for easy access. Large knots cause machine stop. Small knots cause 0-9 courses at specified knot detection speed, then automatically resume at set speed.	
Stop motion	Yarn break, large knot, wraparound check, shock detection, piece count, over-torque, program error, etc.	
Drive system	Belt drive. AC servo motor. No lubrication necessary.	
Cleaner	Special blower-operated cleaner	
Safety devices	Full safety cover for noise-suppression and dust-proofing with stop motion sensor and interlock mechanism. Stop button. Power supply disconnecting device. Ultra-low speed "crawl" setting. CE Mark. Indicator lamps (see below).	
Operation lamp	Green/normal operation. Flashing green/normal stop. Flashing amber/abnormal stop.	
CONTROLLER		
Data input	USB memory interface. USB 3.5" MO disk interface. Ethernet 10 / 100 BASE - T network interface.	
Pattern memory	12,582,912 bits (1,024 wales × 4,096 addresses)	
Control unit	Built-in controller. Stored program for flat knitting machine.	
Control display	Monochrome LCD panel. Editing possible via display panel operation. Available in English, French, Italian, Spanish, Portuguese, German, Turkish, Russian, Chinese, Korean and Japanese.	

Fully Fashioned High-Speed Knitting Machine
