

P R I M O

It is the first fully automatic yarn feeder created for the knitting industry, so far limited to use storage or positive feeders.

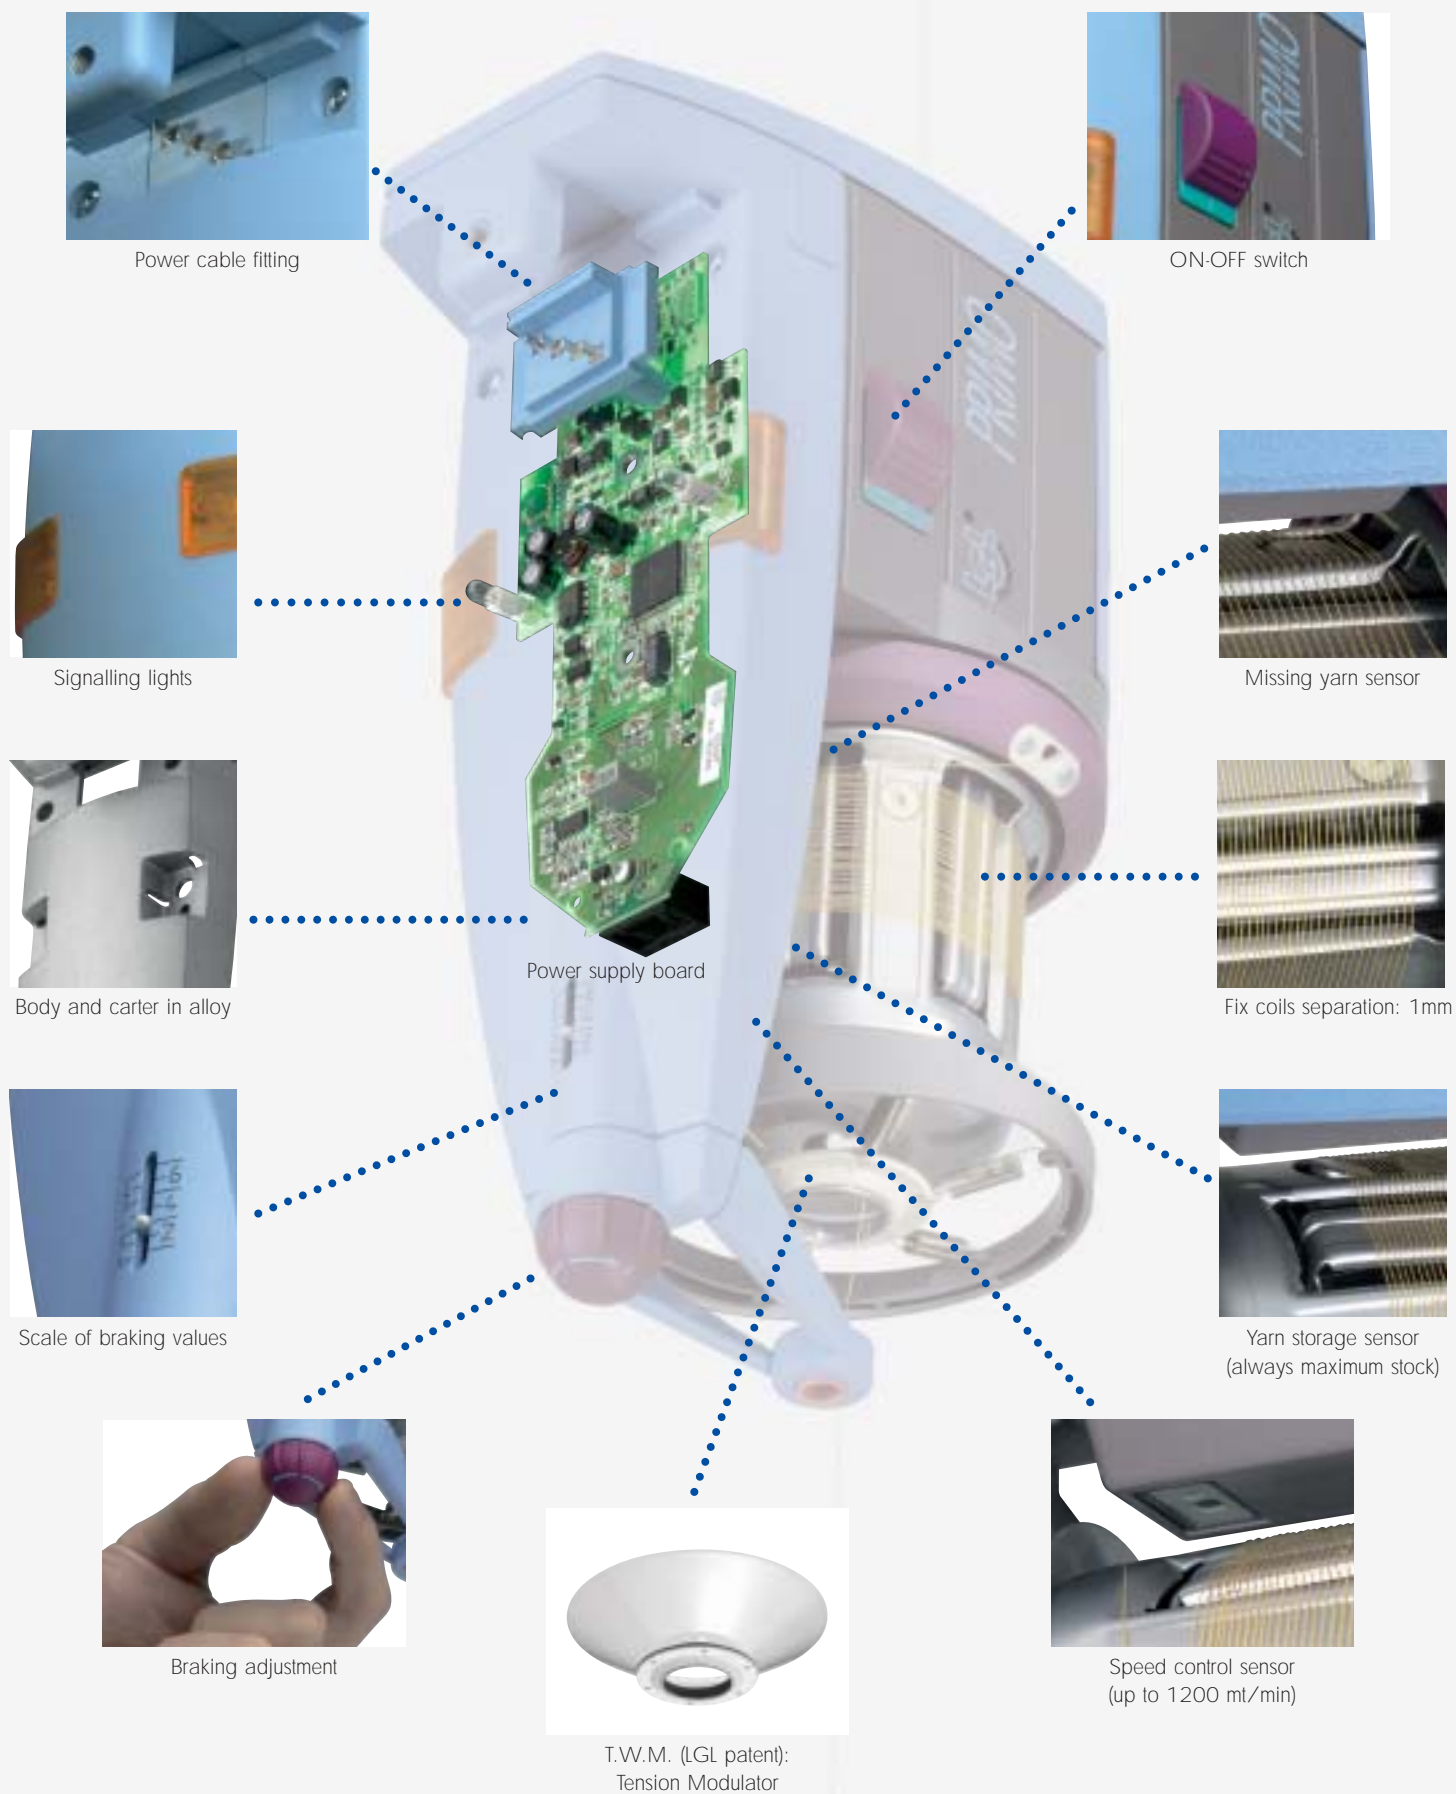

Its capabilities of feeding a broad variety of threads and of controlling the yarn tension allow to knit top quality fabrics at higher speed with uniform fabric structure.

It offers:

- Regular supply of yarn according to the real need of the knitting machine
- Low energy consumption
- Silent running
- Automatic feeding speed
- Separated yarn on its spool body
- Tension Modulator (LGL patent): constant, low tension and self cleaning brake

Characteristics:

- Range of yarns: from 5 Den to 800 Den
- Spool body diameter: 69 mm
- Electronic measuring system of the yarn used by each feed (optional)
- Dimensions: 250 mm long, 100 mm wide, 155 mm high
- Weight: 2.5 kg
