

## UNICO2 - A New Concept 'Yarn Storage and Release' Solution

- UNICO2 device is applied on ULTRAFEEDER2 and is specifically designed for Hosiery and Knitting Applications
- UNICO2 is able to automatically compensate sudden and high yarn absorption variations, thanks to an innovative Patented Working System
- A fully integrated 'CLOSED LOOP' System featuring both Positive Yarn Constant Tension Control & Yarn Storage & Release capabilities

### MAIN BENEFITS

- It dramatically increases Garment Quality and guarantee TOP Standards
- It allows the machine to operate at Max Speed / Efficiency (no limits by the feeder technology)
- 'Graduation Compression' Function for unlimited new product styles and fashion features capability
- Extremely User-friendly, plug & play set-up

### MAIN APPLICATIONS

- HOSIERY - High stitch selection capability
- SOCKS - All yarns, also Toe & Heel
- SEAMLESS - Extreme patterns & all yarns applications by replacing traditional storage feeders
- CIRCULAR KNITTING - Striper & Striper Jacquard
- FLAT KNITTING - All yarns (REVERSE Function)
- UPPER SHOES - All yarns (REVERSE Function)
